## **PROFESSIONAL SUMMARY**

Results-driven IT Business Analyst with 4+ years of experience bridging business needs and technical solutions. Proven expertise in requirements elicitation, stakeholder management, and software development lifecycle coordination. Skilled in translating complex business requirements into technical specifications, facilitating UAT, and leveraging AI-powered tools to enhance productivity and analysis. Adept at ensuring alignment between business objectives and technical deliverables.

## **PROFESSIONAL EXPERIENCE**

### **IT Business Analyst**

**Omayar – Software Solutions Company | Asaba, Nigeria**

*July 2022 – October 2025*

- Served as primary Business Analyst liaison between business stakeholders and technical teams across 20+ software development projects, leading requirements elicitation, stakeholder workshops with 30+ business users, and ensuring alignment between client objectives and technical capabilities
- Led end-to-end requirements gathering, feature definition, and development oversight for an AI-powered real estate application, implementing a natural language property search and an intelligent recommendation system using OpenAI API based on user preferences, resulting in enhanced user experience and improved response times
- Conducted comprehensive needs assessments for 15+ enterprise projects, translating complex business requirements into clear technical specifications, user stories, and detailed documentation (BRDs, FRDs, process flow diagrams), resulting in a 25% reduction in development rework
- Facilitated 50+ User Acceptance Testing (UAT) sessions and performed comprehensive gap analysis to ensure deliverables met business expectations, achieving a 98% requirement accuracy rate
- Collaborated with cross-functional teams in Agile/Scrum environments, participating in sprint planning, daily standups, and retrospectives to ensure iterative delivery of business value

### **Software Engineer**

**Omayar – Software Solutions Company | Asaba, Nigeria**

*January 2020 – June 2022*

- Designed, developed, and maintained scalable software solutions for 10+ client projects, applying technical knowledge to meet diverse client requirements and business objectives

- Participated in requirements gathering sessions, working closely with clients to understand technical and functional needs, bridging communication between business and development teams
- Contributed to end-to-end product development cycles for 8+ applications, from initial requirements analysis and design through development, testing, and deployment

## **Software Engineer Intern**

**Comeriver | Ibadan, Nigeria**

*October 2018 – March 2019*

- Collaborated with software engineering teams and Business Analysts to design and develop customised web applications addressing specific business requirements for 5+ client projects
- Managed maintenance and updates for the Comeriver Music web application, working with stakeholders to gather enhancement requirements and ensuring optimal performance
- Participated in requirements analysis sessions and technical documentation efforts, gaining foundational experience in translating business needs into technical solutions

## **EDUCATION**

### **MSc Software Engineering with Management Studies (Distinction)**

*Kingston University London | September 2025*

Key Modules: Software Architecture, Agile Development, Software Quality Engineering, Business in Practice

### **B.Eng Electrical & Electronic Engineering**

*Niger Delta University, Wilberforce Island, Nigeria | November 2019*

Key Modules: C Programming, C++, Java, Web Technologies, Data Structures & Algorithms, Operating Systems

## **CORE SKILLS**

**Professional Skills:** Problem-Solving | Critical Thinking | Analytical Reasoning | Communication | Presentation & Training | Team Collaboration | Project Coordination | Time Management | Adaptability | Customer-Centric Approach | Leadership

**Business Analysis & Strategy:** Requirements Gathering & Documentation | Stakeholder Management | Gap Analysis | Process Mapping & Optimisation | User Acceptance Testing (UAT) | Feasibility Studies | Use Case Development | User Story Creation | Business Requirements Documents (BRDs) | Functional Requirements Documents (FRDs)

**Technical Competencies:** JavaScript | React.js | Node.js | SQL | MongoDB | OpenAI API Integration | Git/Version Control

**Methodologies & Tools:** Agile/Scrum | Waterfall | Software Development Lifecycle (SDLC) | JIRA | Confluence | Microsoft Visio | Lucidchart | Microsoft Office Suite | Technical Documentation
